Science and Engineering Research Facilities: Fiscal Year 2011

Detailed Statistical Tables | NSF 13-309 | February 2013

Michael Gibbons,
Project Officer
Research and Development Statistics Program
(703) 292-4590

General Notes

The data in these tables are collected biennially through the National Science Foundation's (NSF's) congressionally mandated Survey of Science and Engineering Research Facilities.

The FY 2011 survey was sent to research-performing academic research institutions in the United States. For the purposes of this survey, research-performing academic institutions were defined as colleges and universities with \$1 million or more in research and development expenditures. Each academic institution's level of R&D expenditures was determined by the FY 2010 NSF Higher Education Research and Development Survey (HERD). Military institutions, U.S. Department of Veterans Affairs institutions, and federally funded research and development centers (FFRDCs) were not included in the survey. Previously, biomedical institutions that received support from the National Institutes of Health were surveyed. In FY 2011 nonprofit biomedical research institutions were no longer included.

These tables provide data on the amount of science and engineering research space existing at the eligible U.S. colleges and universities. Additional data are provided on the condition of facilities; current, planned, and deferred repair and renovation; and current, planned, and deferred construction projects. Selected tables provide information reported by all institutions that participated in the survey.

The FY 2009 data related to new construction and source of funds for new construction shown in the FY 2011 tables have been revised to reflect updated information from the respondent institutions. See appendix A, "Technical Notes," for more information.

The tables also provide data on the characteristics of networking and computing capacity. These data focus on commodity and high-performance bandwidth, desktop port connections, high-performance computing, and wireless connections.

Data Tables

Table S&E Research Facilities in Academic Institutions

Research space

by field

- 1 FY 2007–11
- 2 by type of institution: FY 2011
- 3 condition of: FY 2011
- 4 by geographic region and EPSCoR status: FY 2011
- 5 by type of institution
- 6 by field
- 6 by state, control, institution, and field: FY 2011

New construction

- 7 by type of institution and time of construction: FY 2004–13
- 8 by field and time of construction: FY 2006–13
- 8 started in FY 2010 or FY 2011
- 9 by field and geographic region
- 10 by state, control, institution, and field
- 10 planned to start in FY 2012 or FY 2013
- 11 by field and geographic region
- 12 by state, control, institution, and field

Costs for new construction

- 13 by field and time of construction: FY 2006–13
- 13 by type of institution and time of construction
- 14 for research animal space: FY 2004–11
- 15 total costs and space: FY 2006–13
- 15 started in FY 2010 or FY 2011
- 16 by field and geographic region
- 17 by state, control, institution, and field
- 17 planned to start in FY 2012 or FY 2013
- 18 by field and geographic region
- 19 by state, control, institution, and field
- 20 by geographic region and time of construction: FY 2006–13
- 21 by state, control, institution, and time of construction: FY 2006–13

Costs for repair and renovation

- 22 by field and time of repair and renovation: FY 2006–13
- 23 by type of institution and time of repair and renovation: FY 2004–13
- 23 started in FY 2010 or FY 2011

- 24 by field and geographic region
- 25 by state, control, institution, and field
 - planned to start in FY 2012 or FY 2013
- 26 by field and geographic region
- 27 by state, control, institution, and field
 - by time of repair and renovation: FY 2006–13
- 28 by geographic region
- 29 by state, control, and institution
 - institutions with repair and renovation or new construction projects
- 30 by type of institution: Started in FY 2010 or FY 2011

Source of funds for new construction or repair and renovation

- by type of institution: FY 2010 or FY 2011
- 31 new construction
- 32 repair and renovation
 - by year of project start and type of institution: FY 1986–2011
- 33 for new construction
- 34 for repair and renovation

Estimated costs of deferred construction or repair and renovation projects: FY 2011

- 35 by field and type of project
- 36 by type of institution and project

Networking and Computing Capacity Bandwidth

- total, by type of institution
- 37 FY 2011
- 38 FY 2012 (estimated)
- to Internet2, by type of institution
- 39 FY 2011
- 40 FY 2012 (estimated)
- to National LambdaRail, by type of institution
- 41 FY 2011
- 42 FY 2012 (estimated)

Institutions with high-performance network connections

- 43 by type of institution: FY 2005–11

Desktop port connections

- by type of institution: FY 2011

- 44 highest desktop port speed
- 45 speed of the highest proportion of desktop ports

Institutions with dark fiber

- 46 by type of institution: FY 2005–11

Network speeds

- 47 highest internal network speeds, by type of institution: FY 2011

Wireless connections

- 48 by building area coverage and type of institution: FY 2011

Centrally administered high-performance computing: FY 2011

- by type of computing architecture
- 49 by type of institution
- 50 peak theoretical performance of fastest systems
- 51 architectures, by state, control, institution, and speed
 - by type of institution
 - 52 external users of, by type of user
 - 53 usable online storage for
 - 54 archival storage for

TABLE 1. Science and engineering research space in academic institutions, by field: FY 2007–11
 (Net assignable square feet in millions)

Field	FY 2007	FY 2009	FY 2011
All research space	187.9	196.1	202.9
Agricultural and natural resources sciences	27.9	29.5	27.6
Biological and biomedical sciences	44.8	50.3	54.3
Computer and information sciences	4.8	5.2	5.0
Engineering	28.4	30.2	31.7
Health and clinical sciences	37.0	36.3	36.7
Mathematics and statistics	1.6	1.5	1.6
Physical sciences			
Earth, atmospheric, and ocean sciences	8.4	8.0	7.8
Astronomy, chemistry, and physics	20.3	20.5	21.8
Psychology	4.9	5.2	5.5
Social sciences	6.0	5.5	5.7
Other	3.7	3.9	5.2
Research animal space	17.8	18.1	18.5

NOTES: Details may not add to totals due to rounding. Research animal space is listed separately and is also included in individual field totals.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities.

TABLE 2. Science and engineering research space in academic institutions, by field and type of institution: FY 2011
 (Net assignable square feet in millions)

Field	All institutions	Highest degree granted		Control	
		Doctorate	Nondoctorate	Public	Private
All research space	202.9	194.6	8.2	149.6	53.3
Agricultural and natural resources sciences	27.6	26.7	0.9	26.5	1.1
Biological and biomedical sciences	54.3	52.1	2.2	35.6	18.7
Computer and information sciences	5.0	4.7	0.3	3.5	1.5
Engineering	31.7	30.9	0.8	24.5	7.2
Health and clinical sciences	36.7	36.3	0.4	25.6	11.1
Mathematics and statistics	1.6	1.3	0.2	1.0	0.5
Physical sciences					
Earth, atmospheric, and ocean sciences	7.8	7.3	0.4	6.3	1.5
Astronomy, chemistry, and physics	21.8	20.2	1.6	15.1	6.7
Psychology	5.5	5.0	0.5	3.9	1.6
Social sciences	5.7	5.2	0.5	4.2	1.5
Other	5.2	4.9	0.2	3.3	1.8
Research animal space	18.5	17.9	0.6	14.1	4.4

NOTES: Details may not add to totals due to rounding. Research animal space is listed separately and is also included in individual field totals.

TABLE 3. Condition of science and engineering research space in academic institutions, by field: FY 2011

Field	NASF (millions) ^a	Condition (% NASF)			
		Superior	Satisfactory	Requires renovations	Requires replacement
All research space	200.9	36	45	16	4
Agricultural and natural resources sciences	27.6	23	54	20	4
Biological and biomedical sciences	53.7	39	42	15	4
Computer and information sciences	4.9	49	42	8	2
Engineering	31.5	35	45	16	4
Health and clinical sciences	36.2	42	42	13	3
Mathematics and statistics	1.6	32	54	12	2
Physical sciences					
Earth, atmospheric, and ocean sciences	7.6	32	44	20	5
Astronomy, chemistry, and physics	21.7	33	44	18	4
Psychology	5.4	34	47	16	3
Social sciences	5.7	31	50	17	2
Other	5.0	51	36	9	4

NASF = net assignable square feet.

^a NASF is amount of NASF located at only those institutions that also rated condition of their space. Consequently, table accounts for approximately 2 million fewer NASF than other tables.

NOTES: Details may not add to totals due to rounding. Condition was assessed relative to current research program.

TABLE 4. Science and engineering research space in academic institutions, by type of institution, geographic region, and EPSCoR

status: FY 2011

(Net assignable square feet in millions)

Type of institution	United States	Region				EPSCoR eligible states
		Midwest	Northeast	South	West	
All institutions	202.9	46.2	41.4	70.5	43.6	43.7
Doctorate granting	194.6	44.4	38.8	68.9	41.4	42.3
Nondoctorate granting	8.2	1.8	2.6	1.6	2.2	1.4
Public	149.6	37.5	16.4	56.5	38.0	39.3
Private	53.3	8.7	25.0	14.0	5.6	4.3
Medical schools	48.3	10.3	12.4	16.3	9.2	7.4

EPSCoR = Experimental Program to Stimulate Competitive Research.

NOTES: Details may not add to totals due to rounding. Guam, Puerto Rico, and U.S. Virgin Islands are included in national statistics and other appropriate table columns but are excluded from geographic regions.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities, FY 2011.

TABLE 5. Science and engineering research space in academic institutions, by field, geographic region, and EPSCoR status: FY 2011
 (Net assignable square feet in millions)

Field	United States	Region				EPSCoR eligible states
		Midwest	Northeast	South	West	
All research space	202.9	46.2	41.4	70.5	43.6	43.7
Agricultural and natural resources sciences	27.6	8.0	2.9	11.3	5.0	10.2
Biological and biomedical sciences	54.3	11.5	12.9	19.3	10.1	10.1
Computer and information sciences	5.0	1.6	1.2	1.4	0.8	0.8
Engineering	31.7	6.9	6.3	12.1	6.4	7.1

NA = not available; data were not provided by institution.

NOTES: Details may not add to totals due to rounding. Data are unadjusted; totals of data will not match totals in tables with weighted and imputed data.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities, FY 2011.

TABLE 20. Costs for new construction of science and engineering research space in academic institutions, by geographic region and time of construction: FY 2006–13
 (Costs in millions of dollars)

Geographic region	Started in	Started in	Started in	Planned to	Deferred projects	
	FY 2006 or FY 2007	FY 2008 or FY 2009	FY 2010 or FY 2011	start in FY 2012 or FY 2013	Included in institutional plan	Not included in institutional plan
United States	5,923.5	7,336.0	6,411.3	6,521.1	10,968.0	3,000.0
Midwest	657.1	817.2	848.4	1,312.0	2,573.3	1,303.5
Northeast	1,595.2	2,073.8	1,254.2	1,373.3	1,443.6	814.8
South	1,902.6	2,905.8	2,523.4	2,311.9	3,792.2	698.9
West	1,766.7	1,478.9	1,784.6	1,517.2	3,158.9	182.8

NOTES: Details may not add to totals due to rounding. Guam, Puerto Rico, and U.S. Virgin Islands are included in national statistics but are excluded from geographic regions.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities.

na = not applicable; institution was not surveyed. NA = not available; data were not provided by institution.

^a In FY 2007 and FY 2009, institution was surveyed together with other affiliated institutions. As such, no data are available for FY 2007 or FY 2009.

^b In FY 2007 and FY 2009, institution was surveyed together with other affiliated institutions; data for those survey years describe characteristics of the group of institutions. In FY 2011, affiliated institutions were surveyed separately; data for FY 2011 describe characteristics of single institution.

NOTE: Data are unadjusted; totals of data will not match totals in tables with weighted and imputed data.

na = not applicable; institution was not surveyed. NA = not available; data were not provided by institution.

^a In FY 2007 and FY 2009, institution was surveyed together with other affiliated institutions. As such, no data are available for FY 2007 or FY 2009.

^b In FY 2007 and FY 2009, institution was surveyed together with other affiliated institutions; data for those survey years describe characteristics of the group of institutions. In FY 2011, affiliated institutions were surveyed separately; data for FY 2011 describe characteristics of single institution.

NOTE: Data are unadjusted; totals of data will not match totals in tables with weighted and imputed data.

Private	54	22	9

NOTES: Internet2 is a high-performance hybrid optical packet network intended to provide both production services and platform for development of new networking ideas and protocols. National LambdaRail is an advanced optical network infrastructure for research and education. Institutions may have connections to more than one high-performance network.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities.

TABLE 44. Highest desktop port speed at academic institutions, by type of institution: FY 2011
 (Percent distribution)

Type of institution	Number of institutions	Speed			
		10 mbps or less	100 mbps	1 gbps	10 gbps or more
All institutions	539	1	11	80	8
Doctorate granting	379	*	8	82	9
Nondoctorate granting	160	2	16	77	4
Public	342	*	9	82	8
Private	197	2	13	78	7

* = value > 0 but < 0.5%.

gbps = gigabits per second; mbps = megabits per second.

NOTE: Details may not add to totals due to rounding.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities, FY 2011.

TABLE 45. Speed of the highest proportion of desktop ports at academic institutions, by type of institution: FY 2011
 (Percent distribution)

Type of institution	Number of institutions	Speed			
		10 mbps or less	100 mbps	1 gbps	10 gbps or more
All institutions	539	4	66	30	*
Doctorate granting	379	4	65	31	*
Nondoctorate granting	160	4	68	29	0
Public	342	4	69	27	*
Private	197	4	61	36	0

* = value > 0 but < 0.5%.

gbps = gigabits per second; mbps = megabits per second.

NOTE: Details may not add to totals due to rounding.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities, FY 2011.

TABLE 46. Academic institutions with dark fiber, by type of institution: FY 2005–11
(Percent)

Type of institution	Owned at end of FY 2005		Owned at end of FY 2007		Owned at end of FY 2009		Owned at end of FY 2011	
	To ISP	Between buildings						
All institutions	29	86	37	89	39	89	47	90
Doctorate granting	33	88	41	90	44	92	54	93
Nondoctorate granting	19	80	27	87	30	84	30	83
Public	30	87	37	92	43	92	54	94
Private	26	82	36	84	33	84	35	84

ISP = internet service provider.

NOTE: Dark fiber is fiber optic cable that has already been laid but is not being used.

SOURCE: National Science Foundation/National Center for Science and Engineering Statistics, Survey of Science and Engineering Research Facilities.

TABLE 47. Highest internal network speeds at academic institutions, by type of institution: FY 2011
 (Percent distribution)

Speed	All institutions	Highest degree granted		Control	
		Doctorate	Nondoctorate	Public	Private
10 mbps or less	1	1	0	1	1
11 mbps–999 mbps	16	12	24	15	17
1 gbps–2.4 gbps	49	43	62	45	54

TABLE 49. Centrally administered high-performance computing in academic institutions, by type of institution and computing architecture: FY 2011

Type of institution	Number of institutions	Number of institutions with HPC	Type of architecture				Number of institutions with HPC accelerators
			Clusters	MPP	SMP	Other	
All institutions	539	192	187	21	37	38	101
Doctorate granting	379	178	174	17	33	36	97
Nondoctorate granting	160	14	13	4	4	2	4
Public	342	135	131	16	26	24	77
Private	197	57	56	5	11	14	24

HPC = high-performance computing; MPP = massively parallel processors; SMP = symmetric multiprocessors.

NOTES: Each institution is counted only once in each architecture. Centrally administered HPC is located within distinct organizational unit with staff and budget; unit has stated mission that includes supporting HPC needs of faculty and researchers. Institutions may have HPC of more than one type of architecture. Accelerators may be system components or independent.

Appendix A. Technical Notes

Scope of Survey

The data presented in these tables are collected biennially through the National Science Foundation's (NSF's) congressionally mandated Survey of Science and Engineering Research Facilities (Facilities Survey). The survey originated in 1986 in response to the U.S. Congress's concern about the state of research facilities at the nation's colleges and universities. NSF's 1984 reauthorization legislation, P.L. 99-159, mandated a data collection and analytic system to identify and assess the research facilities needs of academic institutions. The National Institutes of Health (NIH) cosponsored all cycles of the survey through FY 2009, allowing for the inclusion of nonprofit biomedical research institutions in the survey population.

Recognizing the growing use of networking and computing capacity in conducting research, a set of questions on these topics was added to the FY 2003 Facilities Survey and revised for each subsequent survey.

Population

The FY 2011 population consisted of 554 research-performing academic institutions in the United States. Research-performing academic institutions were defined as colleges and universities with \$1 million or more in research and development expenditures. Each academic institution's level of R&D expenditures was determined by the FY 2010 NSF Higher Education Research and Development Survey (HERD). Military institutions, U.S. Department of Veterans Affairs (VA) institutions, and federally funded research and development centers (FFRDCs) were excluded. Nonprofit biomedical research institutions were not included in the FY 2011 survey cycle.

Response Rate

The FY 2011 survey was mailed to academic institutions in November 2011, and data collection ended in April 2012. Of the 554 institutions contacted, 98% completed surveys. The FY 2011 survey had limited item nonresponse. Nonresponse ranged from 0% to 3% for 98% of the items. Six cyberinfrastructure items applied to 25 or fewer participants. Each of these items had two nonresponses.

Adjustment for Nonresponse

Unit Nonresponse

The FY 2011 Facilities Survey attempted to obtain responses from all institutions in the defined population. Consequently one of the usual sources of survey error, sampling error, is not of concern in this survey. However, as is the case in almost all surveys, nonresponse error is of concern. In the FY 2011 Facilities Survey, 98% of all eligible institutions responded.

Weights were used to account for unit nonresponse. The weights were adjusted for the known number of academic institutions, by expenditure categories (the quintiles of the distribution), census region, institutional control (public or private), whether the institution granted doctor of philosophy degrees, and the presence of a medical school. The minimum weights were constrained to be at least 1.0.

The FY 2011 Facilities Survey Detailed Statistical Tables contain two sets of data: part 1 (research space), and part 2 (computing and networking). The data in all part 1 tables are weighted according to the previously described procedures, except for the data on condition of research space and the data presented by state and control (i.e., public vs. private) and individual institution tables (i.e., tables 6, 10, 12, 17, 19, 21, 25, 27, 29, and 51). Data in those tables are unweighted. None of the data in part 2 tables are weighted. The part 2 data are not weighted due to potential measurement error within the survey responses. It is believed that substantially greater measurement error may exist in the part 2 data because of the rapidly

changing nature and variability of the part 2 data. Likewise, item nonresponse is not imputed for part 2 questions.

Item Nonresponse

For most part 1 questions, a series of logistic regression models and linear regression models was developed and used to impute the values for all missing data for institutions that responded to the survey. The predicted values from these models were used to impute for the missing responses.

A set of core predictors was used for imputing most items. The core predictors were institutional control (public or private), highest degree granted (doctorate or nondoctorate), existence of a medical school, FY 2010 total R&D expenditures (overall), and total net assignable square feet (NASF).

In addition to the core predictors, regression models for specific survey items included data from responses to other survey items.

Tables showing data by state, control, and individual institution are based on unimputed data.

Imputation was performed for 141 of 308 survey items (46%) within part 1. The remaining survey items in part 1 had no missing data and therefore did not require imputation. Items in part 2 were not imputed. For the items that were imputed, the imputation rates ranged from 0.6% to 3.0%. The imputation rate for each survey item was calculated as the number of imputed cases divided by the number of institutions asked the question. Eighty-six percent of survey items that required imputation had an imputation rate at or below 1.5%.

Definitions

Bandwidth is the amount of data that can be transmitted in a given amount of time, measured in bits per second.

Centrally administered high-performance computing (HPC) is located within a distinct organizational unit with a staff and a budget and is generally available to the campus community. The unit has a stated mission that includes supporting HPC needs of faculty and researchers.

Commodity Internet (Internet1) is the general public, multiuse network often called "the Internet."

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

Current research program commitments include current faculty and staff (or those to whom offers have been made or grants awarded, whether or not research has actually begun) and also programs that have been approved.

Deferred projects are those that (1) are not funded, and (2) are not scheduled for FY 2012 or FY 2013. They do not include projects planned for developing new programs or expanding current programs. Deferred projects are limited to only those projects whose prorated cost was estimated to be \$250,000 or more for at least one field of science and engineering (S&E).

EPSCoR (Experimental Program to Stimulate Competitive Research). States may be grouped according to their eligibility for NSF funding. States are eligible for the NSF EPSCoR if they have historically received less federal R&D funding than other states. The purpose of

the program is to increase the R&D funding competitiveness of these states by assisting in the development and utilization of science and technology resources located at the major universities. The following states were eligible for this program during FY 2011:

Alabama	Hawaii	Kentucky	Montana
Alaska	Idaho	Louisiana	Nebraska
Arkansas	Iowa	Maine	Nevada
Delaware	Kansas	Mississippi	New Hampshire
New Mexico	South Carolina	Vermont	U.S. Virgin Islands
North Dakota	South Dakota	West Virginia	
Oklahoma	Tennessee	Wyoming	
Rhode Island	Utah		

Geographic regions. States may be divided into the four U.S. geographic regions defined by the U.S. Census Bureau. These are the following:

- Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont
- Midwest: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin
- South: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia
- West: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming

Guam, Puerto Rico, and the U.S. Virgin Islands are excluded from the geographic regions but are included in the national statistics and other appropriate aggregate figures.

Gross square feet (GSF) is the floor area of a structure within the outside faces of the exterior walls.

Institutional control is defined for academic institutions as private or public.

Institutional funds and other sources include the following examples: operating funds, endowments, tax-exempt bonds and other debt financing, indirect costs recovered from federal grants or contracts, and private donations.

Internet2 is a high-performance, hybrid optical packet network. The network was designed to provide next-generation production services as well as a platform for the development of new networking ideas and protocols.

Medical school is a school that awards a doctor of medicine degree or a doctor of osteopathic medicine degree.

National LambdaRail is an advanced optical network infrastructure for research and education. National LambdaRail enables cutting-edge exploration in the sciences and in network research.

Net assignable square feet (NASF) is the sum of all areas on all floors of a building assigned to, or available to be assigned to, an occupant for a specific use, such as research or instruction. NASF is measured from the inside faces of walls.

New construction is the construction of a new building or additions to an existing building. New construction is limited to only those projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E.

Repairs and renovations are activities such as fixing facilities in deteriorated condition, capital improvements on facilities, conversion of facilities, and the building out of shell space. They include any repairs or renovations to existing space that are performed in combination with new construction projects. They do not include building additions because they are reported in this survey under new construction. Repairs and renovations are limited to only those projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E.

Research is all sponsored S&E R&D activities that are separately accounted for and budgeted. Research can be funded by the institution itself, the federal government, a state government, foundations, corporations, or other sources. It does not include departmental research that is not separately budgeted.

Research space is the net assignable square feet of space in buildings within which research activities take place. Research facilities are located within buildings. A building is a roofed structure for permanent or temporary shelter of persons, animals, plants, materials, or equipment. Structures should be included if they are (1) attached to a foundation; (2) roofed; (3) serviced by a utility, exclusive of lighting; and (4) a source of significant maintenance and repair activities. Research space includes controlled-environment space, such as clean, cold, or white rooms; technical and laboratory support space, such as equipment areas, preparation areas, darkrooms, carpentry and machine shops, storage areas, and so forth; laboratories, including computer labs, behavior observation rooms, and so forth; core laboratories that serve other laboratories; laboratories and associated support areas used for research animals, including procedure rooms, bench space, animal production colonies, holding rooms, germ-free rooms, surgical facilities, recovery rooms, and so forth; housing facilities for research animals and associated maintenance areas, including cage rooms, stalls, wards, isolation rooms, exercise rooms, feed storage rooms, cage-washing rooms, holding and storage areas, and so forth; space for clinical trial research; offices, to the extent that they are used for research activities, including administrative activities for a specific research project; space with fixed (built-in) equipment such as fume hoods; space with nonfixed equipment costing \$1 million or more each, such as magnetic resonance imaging equipment; and space that is leased by your institution. Research space does not include space for the fields of law, business administration/management, humanities, history, the arts, or education; libraries, unless they are dedicated to a specific research project; animal field buildings sheltering animals that do not directly support research or that are not subject to government regulations concerning humane care and use of laboratory animals; FFRDCs; in-kind space used by faculty, staff, or other persons from the institution but administered by other organizations, such as research facilities at nonuniversity hospitals or VA hospitals; space administered by the institution but leased to another organization; and outdoor areas such as fish ponds or planting fields.

Data Comparability and Changes in Reporting

Data Comparability

Changes in survey questions, and major survey improvements and changes in procedures and practices, may affect the comparability of statistics produced from the survey over time. Survey questions on the "Computing and Networking" section of the survey are significantly revised each survey cycle to reflect new topics of interest and/or advances in technology.

In 2011, data were compared on individual institutions' new construction projects (including name, gross square feet, NASF, and cost of project) that were reported to both the FY 2009

and FY 2011 surveys. Twenty-one projects with the same or similar characteristics were identified. With institution approval, three construction projects were deleted from their institutions' FY 2009 new construction data to avoid double-counting these projects as new in FY 2011.

To reflect these deletions, data on the source of funding for new construction projects were revised. The three new construction projects removed from the FY 2009 data affected the records of three institutions: for one, the removal eliminated the only new construction project that was reported, so all funds reported by source for new construction were also deleted for that institution. For the remaining two, costs associated with the deleted projects were subtracted from the sources of funds total for each institution. The remaining funds were reallocated to source by distributing the remaining funds across sources indicated using the same allocation that had been initially reported by the institution (institution-level data are not reported in the detailed tables). Consequently, some new construction totals for FY 2008–09 in tables 7, 8, 13, 14, 15, 20, and 33 of this report are slightly lower than those published for the FY 2009 survey.

Changes in Reporting

2011

Survey section "Research Space." Questions were revised, including changes to the lists of disciplines included in some fields of S&E to be consistent with the 2010 Classification of Instructional Programs. The following questions on research animal space from the FY 2009 survey cycle were deleted:

- Question 7. Condition of research animal space
- Question 8. Biosafety level of research animal facilities
- Question 10. Research animal facilities: repairs and renovations
- Question 15. Research animal facilities: planned repairs and renovations
- Question 18. Research animal facilities: planned new construction
- Question 21. Research animal facilities: deferred repairs and renovations
- Question 24. Research animal facilities: deferred new construction

Survey section "Computing and Networking." Question 4 (on federal government research networks) and Question 12 (on centrally administered HPC with accelerators) were added. Question 11 (on centrally administered HPC architectures of 1 teraflop or faster) was modified to include an instruction on reporting systems with accelerators and contains updated definitions for the HPC architectures. Many questions were updated for increased speeds. The following questions from the FY 2009 survey cycle were deleted:

- Question 4. Commodity internet bandwidth
- Question 6. High-performance network connections
- Question 13. HPC centrally administered resources
- Question 23. Conditioned machine room space for centrally administered HPC

2003

Beginning with the FY 2003 cycle and continuing with each subsequent survey cycle, respondents were requested to provide data on their institution's individual, new construction projects. Respondents provided several types of data for each project, including name, gross square feet, NASF, and cost of project. Also, a set of questions on networking and computing capacity in conducting research was added to the FY 2003 survey (and revised for each subsequent survey).

Data Availability

Data published in this report are available at <http://www.nsf.gov/statistics/facilities/>. Data are also available for this and other surveys through NSF's Integrated Science and Engineering Resources Data System, WebCASPAR, available at <http://webcaspar.nsf.gov/>. All microdata (except confidential items on condition of space and research animal space) for part 1 and part 2 are available in the data file called "NSF Survey of Science and Engineering Research Facilities (Not Weighted or Imputed)" in the WebCASPAR database system.

Appendix B. Survey Instruments

FY 2011 Survey of Science and Engineering Research Facilities

- Part 1: Research Space
- Part 2: Computing and Networking Capacity (for research and instructional activities)

National Science Foundation

FY 2011 Survey of Science and Engineering Research Facilities

Part 1: Research Space

**INFORMATION COPY
DO NOT USE TO REPORT**

Your participation in this survey is voluntary. However, your institution's response is important. The information from this survey on individual institutions can be used by your institution and other institutions for decision- and policy-making. The data also describe science and engineering research facilities at the national, regional, and state levels.

Based on pretests, responding to this survey (Part 1 and Part 2 combined) typically requires 41 hours depending on how data are maintained at your institution. If you wish to comment on the burden of completing this survey, contact Suzanne H. Plimpton, Reports Clearance Officer, NSF, via e-mail at splimpto@nsf.gov or call 1-703-292-7556. Or, you may write to the Office of Management and Budget, Paperwork Reduction Project (OMB Number 3145-0101), Washington, DC 20503.

If you have a question, please contact Lorraine Lewis via e-mail at facilitiessurvey@westat.com or call 1-888-811-1838. The survey director at the National Science Foundation is Mr. John Jankowski.

Please complete and send this survey to NSF on the web (according to the instructions on page 1) or return it by mail to:

ATTN: NSF Facilities Survey
Westat
1600 Research Boulevard
Rockville, MD 20850

Thank you for your participation.

General information

This questionnaire is available electronically. Go to www.facilitiessurvey.org to access the survey. You will need to click on “Part 1” and then enter the Part 1 Coordinator ID and password. These are provided on the label on the front cover of this paper questionnaire.

Please report information for the **institution** named on the label on the front cover.

If you do not have exact figures for any part of this questionnaire, please provide estimates.

Confidentiality

Information provided on research animal space (Questions 1 row i, 3, and 9f) and on the condition of S&E space (Question 6) will not be publicly available for individual institutions. In accordance with the National Science Foundation Act of 1950, as amended, and other applicable federal laws, your responses will not be disclosed in identifiable form to anyone other than agency employees or authorized persons.

Changes from previous survey cycle

- **Fields of science and engineering (S&E)**

Changes have been made to the lists of disciplines included in some fields of S&E to be consistent with the 2010 Classification of Instructional Programs (CIP 2010). For a description of the fields of S&E, see Question 2 on pages 5–7 or the crosswalk of survey fields of S&E to the National Center for Education Statistics (NCES) 2010 Classification of Instructional Programs (CIP) on pages 27–28.

- **Research Animal Space**

Seven questions on research animal space from the last survey cycle have been deleted

(question numbers shown below refer to those appearing in the FY 2009 survey):

- Condition of research animal space (Question 7)
- Biosafety level of research animal facilities (Question 8)
- Research animal facilities: repairs and renovations (Question 10)
- Research animal facilities: planned repairs and renovations (Question 15)
- Research animal facilities: planned new construction (Question 18)
- Research animal facilities: deferred repairs and renovations (Question 21)
- Research animal facilities: deferred new construction (Question 24)

Definition of science and engineering (S&E) research and research space

Please use these definitions when answering all questions in this survey.

Research is all sponsored research and development activities of your institution that are separately budgeted and accounted for. Research can be funded by your own institution, the federal government, a state government, foundations, corporations, or other sources. It does not include departmental research that is not separately budgeted.

Research space is the net assignable square feet of space in buildings within which research activities take place. Research facilities are located within buildings. A **building** is a roofed structure for permanent or temporary shelter of persons, animals, plants, materials, or equipment. Structures should be included if they are (1) attached to a foundation, (2) roofed, (3) serviced by a utility, exclusive of lighting, and (4) a source of significant maintenance and repair activities.

Net assignable square feet (NASF) is the sum of all areas on all floors of a building assigned to, or available to be assigned to, an occupant for a specific use, such as research or instruction. NASF is measured from the inside faces of walls.

Science and engineering (S&E) includes the following fields: agricultural sciences and natural resources sciences, biological and biomedical sciences, computer and information sciences, engineering, health and clinical sciences, mathematics and statistics, physical sciences, psychology, social sciences, and other science and engineering fields. See Question 2 on pages 5–7 for a detailed list of the disciplines included in each of these fields.

Definition of science and engineering (S&E) research and research space (continued)

Research space includes:

- controlled-environment space, such as clean, cold, or white rooms
- technical and laboratory support space, such as equipment areas, preparation areas, darkrooms, carpentry and machine shops, storage areas, etc.
- laboratories, including computer labs, behavior observation rooms, etc.
- core laboratories that serve other laboratories
- laboratories and associated support areas used for research animals, including procedure rooms, bench space, animal production colonies, holding rooms, germ-free rooms, surgical facilities, recovery rooms, etc.
- housing facilities for research animals and associated maintenance areas, including cage rooms, stalls, wards, isolation rooms, exercise rooms, feed storage rooms, cage-washing rooms, holding and storage areas, etc.
- space for clinical trial research
- offices, to the extent that they are used for research activities, including administrative activities for a specific research project
- space with fixed (built-in) equipment such as fume hoods
- space with nonfixed equipment costing \$1 million or more each, such as MRIs
- space that is leased by your institution

Research space does not include:

- space for the fields of law, business administration/management, humanities, history, the arts, or education
- libraries, unless they are dedicated to a specific research project
- animal field buildings sheltering animals that do not directly support research or that are not subject to government regulations concerning humane care and use of laboratory animals
- Federally Funded Research and Development Centers (FFRDCs)
- in-kind space used by your faculty, staff, or other persons but administered by other organizations, such as research facilities at non-university hospitals or Veterans Administration hospitals
- space administered by your institution but leased to another organization
- outdoor areas such as fish ponds or planting fields

Question 1: Types of science and engineering (S&E) research space

1. Please indicate whether or not your institution had each type of S&E research space listed below at the end of your FY 2011. See pages 2–3 for the definition of research space and fields of S&E.

**Did your institution have this
type of S&E research space
at end of FY 2011?**

(Mark one “X” for each row.)

Types of S&E research space	Yes	No	Uncertain
a. Laboratories, wet or dry, including computer laboratories, behavior observation laboratories, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Laboratory support space, including autoclave rooms, darkrooms, equipment areas, storage areas for research equipment and supplies, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Instructional laboratories that are <i>also</i> used for research.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Core laboratories that serve other laboratories	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Leased space that is used for research	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Offices, to the extent they are used for research	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Space used for research containing nonfixed equipment costing \$1 million or more each, such as MRIs.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Research space in a medical school that awards the M.D. or D.O. degree	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Research animal space	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Reminder: Please see page 1 for confidentiality of this item.			
Laboratories and associated support areas used for research animals that are subject to local, state, and federal government policies and regulations concerning humane care and use of animals. Examples include procedure rooms, holding rooms, recovery rooms, animal production colonies, and storage areas.			
Space for housing research animals and associated maintenance areas that are subject to local, state, and federal government policies and regulations concerning humane care and use of animals. Examples include animal quarters, cage washing rooms, feed storage areas, isolation rooms, and exercise rooms.			
j. Research space that is used for clinical trials	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Question 2: Amount of research space

2. At the end of your FY 2011, how much net assignable square feet was used for research (based on the definition of research space on pages 2–3) for each of the fields of science and engineering (S&E) below? Please include any research animal space in the relevant fields of S&E. You may provide estimates if you do not have exact figures.

Research animal space includes all departmental and central facilities, such as laboratories, housing, and associated support areas, that are subject to local, state, and federal government policies and regulations concerning humane care and use of laboratory animals.

If research space was shared among fields or used for other purposes in addition to research, report the portion of space used for research for each field below. For example, if two fields shared the space equally, report half of the space in one field and half in the other. Or, if an area was used for research one-fourth of the time and for other purposes the rest of the time, report one-fourth of the space as research space.

See pages 27–28 for crosswalk of survey fields of S&E and NCES CIP codes.

Field of S&E

(Include research animal space.)

Net assignable square feet
of research space at end of
FY 2011

the end of FY 2011

Question 3: Research animal space

Reminder: Please see page 1 for confidentiality of this item.

3. At the end of your FY 2011, how much of the research NASF reported in Question 2 was used for research animals?

Research animal space includes all departmental and central facilities, such as laboratories, housing, and associated support areas, that are subject to local, state, and federal government policies and regulations concerning humane care and use of laboratory animals.

Research animal portion of the space
included in Question 2 (*If none, enter “0.”*) NASF

Question 4: Clinical trial research space

4. At the end of your FY 2011, how much of the research NASF reported in Question 2 was used for clinical trials?

Clinical trial portion of the space
included in Question 2 (*If none, enter “0.”*) NASF

Question 5: Research space in medical school

5. **If your institution had a medical school**, how much of the research NASF reported in Question 2 was located in the medical school at the end of your FY 2011?

Medical school is a school that awards the M.D. or D.O. degree.

If your institution did **not** have a medical school,
check this box and go to Question 6.....

Medical school portion of the space
included in Question 2 (*If none, enter “0.”*) NASF

Question 6: Condition of research space

Reminder: Please see page 1 for confidentiality of this item.

6. At the end of your FY 2011, what percentage of the research NASF reported in Question 2 fell into each of the four condition categories below? Include research animal space.

Superior condition Suitable for the most scientifically competitive research in this field over the next 2 years (your FY 2012 and FY 2013)

Satisfactory condition Suitable for continued use over the next 2 years (your FY 2012 and FY 2013) for most levels of research in this field, but may require minor repairs or renovation

Requires renovation Will no longer be suitable for current research without undergoing major renovation within the next 2 years (your FY 2012 and FY 2013)

Requires replacement Should stop using space for current research within the next 2 years (your FY 2012 and FY 2013)

For Field of S&E definitions, see Question 2 on pages 5–7.

Field of S&E <i>(Include research animal space.)</i>	<i>Mark "X" if no research space in this field</i>	Percent of net assignable square feet <i>(The percentages should sum to 100 within each row.)</i>				Total

Question 7: Repairs and renovations started in FY 2010 and FY 2011

7. Please provide the completion costs for repair and renovation of S&E research facilities that started during your FY 2010 or FY 2011. Include research animal space in the relevant fields of S&E. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E listed below. For **multi-year projects**, report the entire completion cost even if some work will occur in future years.

Start date is the date on which the physical work of the repairs or renovations actually began.

Repairs and renovations are activities such as fixing up facilities in deteriorated condition, capital improvements on facilities, conversion of facilities, and the building out of shell space. Include any repairs or renovations to existing space that are performed in combination with new construction projects. **Do not** report building additions since they are reported in this survey under new construction.

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

If research facilities are shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do **not** report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do **not** report either field's portion, which is \$200,000 each.

If research facilities are also used for nonresearch activities, report the S&E research portion of the costs for the fields listed below if the research portion is \$250,000 or more. For example, if a facility is used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

If your institution had no repair or renovation projects, check this box and go to Question 9

For Field of S&E definitions, see Question 2 on pages 5–7.

Field of S&E

(Include costs for research animal space.)

Completion costs for projects started in FY 2010 or FY 2011

Question 8: For medical schools only: repairs and renovations in FY 2010 and FY 2011

8. *If your institution had a medical school*, how much of the completion costs for repair and renovation of research facilities as reported in Question 7 was located in the medical school?

Medical school is a school that awards the M.D. or D.O. degree.

If your institution did **not** have a medical school,
check this box and go to Question 9.....

Medical school portion of the costs
included in Question 7 (*If none, enter "0."*).....\$ _____

Question 9: New construction started in FY 2010 and FY 2011

9. Please provide the total number of new construction projects that included S&E research facilities that started during your FY 2010 or FY 2011. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E. Include research animal space in the relevant fields of S&E.

New construction is the construction of a new building or additions to an existing building.

Research facilities are defined on pages 2–3 of the survey questionnaire.

Start date is the date on which the physical work of the construction actually began.

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

If facilities are shared for research and nonresearch activities, report only projects with completion costs of \$250,000 or more for at least one field of S&E research. For example, if a \$300,000 project involves space used for research only one-fourth of the time, this project of \$75,000 for the research facilities should not be reported.

If facilities are shared by two or more fields of S&E, report the new construction project only if at least one field of S&E research has completion costs of \$250,000 or more. For example, if two fields share the costs equally for a research project costing \$400,000, neither field's share of \$200,000 meets the cost minimum.

If your institution had no new construction projects, check this box and go to Question 10

If your institution had one or more new construction projects, enter the number of projects here and fill out a separate Individual Project Form for each one..... _____ projects

Please make additional copies of this form as needed.

Individual Project Form for Question 9

Page 1 of 4

Please complete this form for **each** new construction project that started during your FY 2010 or FY 2011. Include only projects that will cost \$250,000 or more for at least one of the S&E fields. Consider the start date to be the date on which the physical work of the new construction began.

9A. What is the name of this project? _____

9B. During which of your fiscal years did the physical work of new construction begin for this project?

FY 2010
FY 2011

9C. When this project is completed, what is (a) the entire project's (research and nonresearch) gross square feet; (b) the entire project's net assignable square feet; and (c) the S&E research facilities portion in net assignable square feet?

For multi-year projects, report the space expected when the project is completed.

a. Gross square feet (GSF) for entire project (research and nonresearch)..... GSF

Gross square feet (GSF) is the floor area of a structure within the outside faces of the exterior walls.

b. Net assignable square feet (NASF) for entire project (research and nonresearch)..... NASF

Net assignable square feet (NASF) is the sum of all areas on all floors of a building assigned to, or available to be assigned to, an occupant for a specific use, such as research or instruction. NASF is measured from the inside faces of walls.

[NOTE: If the entire project is S&E research, the answers for row b and row c will be the same.]

c. Net assignable square feet for **S&E research facilities** portion (defined on pages 2–3 of the survey questionnaire)..... NASF

Research facilities are defined on pages 2–3 of the survey questionnaire, including examples of what areas to include and exclude.

If the research facilities are also used for nonresearch activities, adjust the amount of space based on the amount of time the area is used for S&E research. For example, if an area is used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the space as S&E research facilities.

Please make additional copies of this form as needed.

Individual Project Form for Question 9

Page 2 of 4

- 9D. When this project is completed, what are the completion costs for (a) the entire project (research and nonresearch), and (b) the S&E research facilities portion of the project? **For multi-year projects**, report the costs expected when the project is completed.

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

a. Completion costs for the GSF of the entire project (research and nonresearch) \$ _____

b. Completion costs for the **S&E research facilities** portion
(defined on pages 2–3 of the survey questionnaire). \$ _____

If the research facilities are also used for nonresearch activities, adjust the completion costs based on the amount of time the facilities are used for S&E research. For example, if a facility is used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

Please make additional copies of this form as needed.

Individual Project Form for Question 9

Page 3 of 4

- 9E. For the portion of this project used for **S&E research facilities**, what are (1) the completion costs, and (2) the net assignable square feet, for each field listed below? **For multi-year projects**, report costs and NASF expected when the project is completed.

Report only fields with costs of \$250,000 or more for research facilities.

If research facilities are shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do not report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do not report either field's portion, which is \$200,000 each.

If research facilities are also used for nonresearch activities, report the S&E research portion of the cost and net assignable square feet for the fields listed below if the research portion is \$250,000 or more. For example, if a facility will be used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

For Field of S&E definitions, see Question 2 on pages 5–7.

c. Institutional funds and other sources Examples: operating funds, endowments, tax-exempt bonds and other debt financing, indirect costs recovered from federal grants/contracts, private donations, other sources	\$ _____	\$ _____
Total	\$ _____	\$ _____

Question 11: Planned repairs and renovations to start in FY 2012 and FY 2013

11. Please provide the estimated completion costs planned for repair and renovation of S&E research facilities that are funded **and** scheduled to start in your FY 2012 or FY 2013. Include research animal space in the relevant fields of S&E. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E listed below. For **multi-year projects**, report the entire completion cost even if some work will occur in future years.

Start date is the date on which the physical work of the repairs or renovations is scheduled to begin.

Repairs and renovations are activities such as fixing up facilities in deteriorated condition, capital improvements on facilities, conversion of facilities, and the building out of shell space. Include any repairs or renovations to existing space that are performed in combination with new construction projects. **Do not** report building additions since they are reported in this survey under new construction.

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

If research facilities are shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do **not** report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do **not** report either field's portion, which is \$200,000 each.

If research facilities will also be used for nonresearch activities, report the S&E research portion of the costs for the fields listed below if the research portion is \$250,000 or more. For example, if a facility will be used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

If your institution does **not** have planned repair or renovation projects, check this box and go to Question 13.....

For Field of S&E definitions, see Question 2 on pages 5–7.

Field of S&E <i>(Include costs for research animal space.)</i>	Completion costs for planned repair/renovation projects to start in FY 2012 or FY 2013
a. Agricultural sciences and natural resources sciences	\$ _____
b. Biological and biomedical sciences.....	\$ _____
c. Computer and information sciences	\$ _____
d. Engineering.....	\$ _____
e. Health and clinical sciences.....	\$ _____
f. Mathematics and statistics	\$ _____

i. Social sciences.....	\$ _____
j. Other field of S&E (<i>Please describe.</i>)	\$ _____

Question 12: For medical schools only: planned repairs and renovations in FY 2012 and FY 2013

12. **If your institution has a medical school**, how much of the completion costs for planned repair and renovation of research facilities as reported in Question 11 will be located in the medical school?

Medical school is a school that awards the M.D. or D.O. degree.

If your institution does **not** have a medical school, check this box and go to Question 13

Medical school portion of the costs included in Question 11 (*If none, enter "0."*) \$ _____

Question 13: Planned new construction to start in FY 2012 and FY 2013

13. Please provide the estimated completion costs and NASF for planned new construction of S&E research facilities that are funded and scheduled to start in your FY 2012 or FY 2013. Include research animal space in the relevant fields of S&E. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E listed below. For **multi-year projects**, report the entire completion cost even if some work will occur in future years.

Start date is the date on which the physical work of the construction is scheduled to begin.

New construction is the construction of a new building or additions to an existing building.

Completion costs include planning, site preparation, construction, fixed equipment, nonfixed equipment that costs \$1 million or more, and building infrastructure such as plumbing, lighting, air exchange, and safety systems either in the building or within 5 feet of the building foundation.

If research facilities are shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do **not** report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do **not** report either field's portion, which is \$200,000 each.

If research facilities are also used for nonresearch activities, report the S&E research portion of the costs and net assignable square feet for the fields listed below if the research portion is \$250,000 or more. For example, if a facility will be used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

If your institution does **not** have any planned new construction projects, check this box and go to Question 15

For Field of S&E definitions, see Question 2 on pages 5–7.

Planned new construction scheduled to start in FY 2012 or FY 2013

Question 14: For medical schools only: planned new construction in FY 2012 and FY 2013

14. *If your institution has a medical school*, how much of the completion costs and NASF for the planned new construction of research facilities as reported in Question 13 will be located in the medical school?

Medical school is a school that awards the M.D. or D.O. degree.

If your institution does **not** have a medical school, check this box and go to Question 15

Completion costs	Net assignable square feet
Medical school portion included in Question 13 (<i>If none, enter “0.”</i>)	\$ _____ NASF _____

Question 15: Deferred repairs and renovations

15. Please provide the estimated costs for any **deferred repair and renovation** projects of S&E research facilities that are needed for current research program commitments, but are not yet funded **and** not yet scheduled to start in your FY 2012 or FY 2013. Include research animal space in the relevant fields of S&E. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E listed below. Please estimate costs separately for projects included in your approved institutional plan and projects not included in this plan. Institutional plans usually will include goals, strategies, and budgets for fulfilling your institution's mission during a specific time period.

Deferred projects are those that: (1) are not funded, and (2) are not scheduled for FY 2012 or FY 2013. Do not include projects planned for developing new programs or expanding your current programs.

Repairs and renovations are activities such as fixing up facilities in deteriorated condition, capital improvements on facilities, conversion of facilities, and the building out of shell space. Include any repairs or renovations to existing space that are performed in combination with new construction projects. **Do not** report building additions since they are reported in this survey under new construction.

Current research program commitments include current faculty and staff or those to whom offers have been made or grants awarded (whether or not research has actually begun) and programs which have been approved.

If research facilities will be shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do **not** report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do **not** report either field's portion, which is \$200,000 each.

If research facilities will also be used for nonresearch activities, report the S&E research portion of the costs for the fields listed below if the research portion is \$250,000 or more. For example, if a facility will be used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

If your institution does **not** have deferred projects
for repair or renovation, check this box and go to Question 17

For Field of S&E definitions, see Question 2 on pages 5–7.

Medical school portion of the costs included in Question 15 (<i>If none, enter "0."</i>).....	\$ _____	\$ _____

Question 17: Deferred new construction

17. Please provide the estimated costs for any **deferred new construction** projects of S&E research facilities that are needed for current program commitments, but are not yet funded **and** not yet scheduled to start in your FY 2012 or FY 2013. Include research animal space in the relevant fields of S&E. Include only projects whose prorated cost was estimated to be \$250,000 or more for at least one field of S&E listed below. Please estimate costs separately for projects included in your approved institutional plan and projects not included in this plan. Institutional plans usually will include goals, strategies, and budgets for fulfilling your institution's mission during a specific time period.

Deferred projects are those that: (1) are not funded, and (2) are not scheduled for FY 2012 or FY 2013. Do not include projects planned for developing new programs or expanding your current programs.

New construction is the construction of a new building or additions to an existing building.

Current research program commitments include current faculty and staff or those to whom offers have been made or grants awarded (whether or not research has actually begun) and programs which have been approved.

If research facilities will be shared by two or more fields, allocate the appropriate share of the costs to each field in order to determine which fields to report. For example, if a field will have one-fourth of the costs for a \$300,000 project, do **not** report that field's share, which is \$75,000. If a \$400,000 project will have two fields with the same costs, do **not** report either field's portion, which is \$200,000 each.

If research facilities will also be used for nonresearch activities, report the S&E research portion of the costs for the fields listed below if the research portion is \$250,000 or more. For example, if a facility will be used for S&E research one-fourth of the time and for instruction the rest of the time, report one-fourth of the completion costs for S&E research facilities.

If your institution does **not** have deferred projects for new construction, check this box and go to Question 19

For Field of S&E definitions, see Question 2 on pages 5–7.

*Thank you. This is the end of Part 1. Part 2, which is bound separately,
covers your institution's computing and networking capacity.*

National Science Foundation

Part 2: Computing and Networking Capacity (for research and instructional activities)

FY 2011 Survey of Science and Engineering Research Facilities

Who should be contacted if clarification of Part 2 networking or computing answers is necessary?

Contact 1

Name:

Title/position:

Telephone:

Email address:

Contact 2

Please complete the questionnaire and send it to your institutional coordinator according to the arrangements you made with your institutional coordinator named in the label above. You may complete this questionnaire online at www.facilitiessurvey.org. You will need to click on "Part 2" and then enter the survey ID and password printed on the label above.

If you have a question, please contact Lorraine Lewis via e-mail at facilitiessurvey@westat.com or call 1-888-811-1838. The survey director at the National Science Foundation is Mr. John Jankowski. If you do not have exact figures for any part of this questionnaire, please provide estimates.

Thank you for your participation.

OMB #3145-0101

Changes from previous survey cycle

- **Question 4 on federal government research networks** has been added.
- **Question 11 on centrally administered high-performance computing (HPC) architectures of 1 teraflop or faster** has been modified to include an instruction on reporting systems with accelerators and contains updated definitions for the HPC architectures.
- **Question 12 on centrally administered HPC with accelerators** has been added.
- Many questions have been updated for increased speeds.
- **Four questions from the last survey cycle have been deleted** (question numbers shown below refer to those appearing in the FY 2009 survey):
 - Commodity internet bandwidth (Question 4)
 - High performance network connections (Question 6)
 - HPC centrally administered resources (Question 13)
 - Conditioned machine room space for centrally administered HPC (Question 23)

Question 1: Total bandwidth

- At the end of your FY 2011, what was your institution's total bandwidth including the commodity internet (Internet1), Internet2, and the National LambdaRail? What is your estimate of this total for your institution at the end of your FY 2012?

Bandwidth is the amount of data that can be transmitted in a given amount of time, measured in bits per second.

Commodity internet (Internet1) is the general public, multiuse network often called "the Internet."

Internet2 is a high-performance hybrid optical packet network. The network was designed to provide next-generation production services as well as a platform for the development of new networking ideas and protocols.

National LambdaRail is an advanced optical network infrastructure for research and education. National LambdaRail enables cutting-edge exploration in the sciences and network research.

Please do not include:

- Redundant connections, which are not normally active but available if a failure occurs with the active connection; or
- Burstable bandwidth.

Please include networking capacity for research, instruction, and residence halls.

Speed	Total bandwidth	
	(Mark one "X" for each column.)	Estimated at end of FY 2012
a. 10 megabits/second or less	<input type="checkbox"/>	<input type="checkbox"/>
b. 11 to 45 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
c. 46 to 99 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
d. 100 megabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
e. 101 to 155 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
f. 156 to 622 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
g. 623 to 999 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
h. 1 to 2.4 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
i. 2.5 to 9 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
j. 10 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
k. 10.1 to 20 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
l. More than 20 gigabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
m. Other (Please specify.)	<input type="checkbox"/> 	<input type="checkbox"/>

Question 2: Internet2 bandwidth

Questions 2–10 include networking capacity for: research, instruction, and residence halls.

2. At the end of your FY 2011, what was your institution's bandwidth to Internet2? What is your estimate of the bandwidth to Internet2 at the end of your FY 2012?

Bandwidth is the amount of data that can be transmitted in a given amount of time, measured in bits per second.

Internet2 is a high-performance hybrid optical packet network. The network was designed to provide next-generation production services as well as a platform for the development of new networking ideas and protocols.

Please do not include redundant connections. A redundant connection is not normally active but is available if a failure occurs with the active connection.

Bandwidth for Internet2

(Mark one "X" for each column.)

Speed	At end of FY 2011	Estimated at end of FY 2012
a. No bandwidth to Internet2.....	<input type="checkbox"/>	<input type="checkbox"/>
b. 10 megabits/second or less	<input type="checkbox"/>	<input type="checkbox"/>
c. 11 to 45 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
d. 46 to 99 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
e. 100 megabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
f. 101 to 155 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
g. 156 to 622 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
h. 623 to 999 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
i. 1 to 2.4 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
j. 2.5 to 9 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
k. 10 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
l. 10.1 to 20 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
m. More than 20 gigabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
n. Other (Please specify.).....	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/>

Question 3: National LambdaRail bandwidth

3. At the end of your FY 2011, what was your institution's bandwidth to National LambdaRail? What is your estimate of the bandwidth to National LambdaRail at the end of your FY 2012?

Bandwidth is the amount of data that can be transmitted in a given amount of time, measured in bits per second.

National LambdaRail is an advanced optical network infrastructure for research and education. National LambdaRail enables cutting-edge exploration in the sciences and network research.

Please do not include redundant connections. A redundant connection is not normally active but is available if a failure occurs with the active connection.

Bandwidth for National LambdaRail

(Mark one "X" for each column.)

Speed	At end of FY 2011	Estimated at end of FY 2012
a. No bandwidth to National LambdaRail	<input type="checkbox"/>	<input type="checkbox"/>
b. 10 megabits/second or less	<input type="checkbox"/>	<input type="checkbox"/>
c. 11 to 45 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
d. 46 to 99 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
e. 100 megabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
f. 101 to 155 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
g. 156 to 622 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
h. 623 to 999 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
i. 1 to 2.4 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
j. 2.5 to 9 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
k. 10 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
l. 10.1 to 20 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
m. More than 20 gigabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
n. Other (Please specify.).....	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	<input type="checkbox"/>

Question 4: Federal government research network connections

4. At the end of your FY 2011, did your institution have connections to any federal government research networks? Do you expect to have connections to any of these networks at the end of your FY 2012?

Federal government research networks are high performance networks which provide access to federal research resources (e.g., Department of Energy's ESnet, NASA's NREN).

(Mark one "X" for each row.)

Fiscal year	Yes	No
a. Connections at the end of FY 2011	<input type="checkbox"/>	<input type="checkbox"/>
b. Connections at the end of FY 2012	<input type="checkbox"/>	<input type="checkbox"/>

Question 5: Bandwidth through consortia

5. At the end of your FY 2011, did your institution obtain any of its bandwidth through a consortium? Do you expect to obtain bandwidth through a consortium at the end of your FY 2012?

A **consortium** is a collaboration of any combination of educational institutions (e.g., university system, regional collaboration), state and local agencies, network infrastructure operators (e.g., Internet2), vendors, health care organizations, or non-profit organizations with the purpose of coordinating and facilitating networking activities.

Bandwidth is the amount of data that can be transmitted in a given amount of time, measured in bits per second.

(Mark one "X" for each row.)

Fiscal year	Yes	No
a. Bandwidth through consortia at the end of FY 2011.....	<input type="checkbox"/>	<input type="checkbox"/>
b. Bandwidth through consortia at the end of FY 2012.....	<input type="checkbox"/>	<input type="checkbox"/>

Please provide the names of all consortia through which you expect to obtain bandwidth at the end of your FY 2012.

Question 6: Desktop port connections

6. At the end of your FY 2011, what percentage of your institution's desktop ports had hardwire connections at each of the speeds listed below? What percentage do you estimate will be at these speeds at the end of your FY 2012? If your answer is between 0 and 1 percent, please round to 1 percent.

Please report on the **capacity of the ports themselves** and not the speed of the workstations connected to them. Also, **do not include servers** when determining your responses.

Speed of connection	Percentage of desktop ports	
	At end of FY 2011	Estimated at end of FY 2012
a. 10 megabits/second or less	%	%
b. 100 megabits/second.....	%	%
c. 1 gigabit/second.....	%	%
d. 10 gigabits/second or more.....	%	%
e. Other (<i>Please specify.</i>).....	%	%
	Total 100%	100%

Question 7: Dark fiber

7. At the end of your FY 2011, did your institution own any dark fiber to your institution's internet service provider (ISP) or between your institution's buildings? Do you plan to acquire any dark fiber to your ISP or between your institution's buildings during your FY 2012?

Dark fiber is fiber-optic cable that has already been laid but is not being used. Include only fiber that was dark (i.e., unlit) when it was purchased by your institution.

(Mark one "X" for each row.)

Owned at the end of FY 2011	Yes	No
a. To your institution's ISP.....	<input type="checkbox"/>	<input type="checkbox"/>
b. Between your institution's buildings	<input type="checkbox"/>	<input type="checkbox"/>

To be acquired during FY 2012	Yes	No
c. To your institution's ISP.....	<input type="checkbox"/>	<input type="checkbox"/>
d. Between your institution's buildings	<input type="checkbox"/>	<input type="checkbox"/>

Question 8: Speed on your network

8. At the end of your FY 2011, what was the ***distribution speed*** (or backbone speed) that a desktop computer on your network could connect to another computer ***on your institution's*** network? What distribution speed will your institution have at the end of your FY 2012?

(Mark one "X" for each column.)

Speed	At end of FY 2011	Estimated at end of FY 2012
a. 10 megabits/second or less	<input type="checkbox"/>	<input type="checkbox"/>
b. 11 to 45 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
c. 46 to 99 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
d. 100 megabits/second.....	<input type="checkbox"/>	<input type="checkbox"/>
e. 101 to 155 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
f. 156 to 622 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
g. 623 to 999 megabits/second	<input type="checkbox"/>	<input type="checkbox"/>
h. 1 to 2.4 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
i. 2.5 to 9 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
j. 10 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
k. 10.1 to 20 gigabits/second	<input type="checkbox"/>	<input type="checkbox"/>
l. More than 20 gigabits/second (<i>Please specify.</i>)	<input type="checkbox"/>	<input type="checkbox"/>
m. Other (<i>Please specify.</i>)	<input type="checkbox"/>	<input type="checkbox"/>

Question 9: Wireless connections

9. At the end of your FY 2011, what percentage, if any, of your institution's building area was covered by wireless capabilities for network access? What percentage do you estimate will have wireless access at the end of your FY 2012?

Building area refers to the sum of floor by floor calculations of square footage.

Please ***do not include*** rogue wireless access points.

Percent of building area		
	At end of FY 2011	Estimated at end of FY 2012
a. None	<input type="checkbox"/>	<input type="checkbox"/>
b. 1 to 10 percent	<input type="checkbox"/>	<input type="checkbox"/>
c. 11 to 20 percent	<input type="checkbox"/>	<input type="checkbox"/>
d. 21 to 30 percent	<input type="checkbox"/>	<input type="checkbox"/>
e. 31 to 40 percent	<input type="checkbox"/>	<input type="checkbox"/>
f. 41 to 50 percent	<input type="checkbox"/>	<input type="checkbox"/>
g. 51 to 60 percent	<input type="checkbox"/>	<input type="checkbox"/>
h. 61 to 70 percent	<input type="checkbox"/>	<input type="checkbox"/>
i. 71 to 80 percent	<input type="checkbox"/>	<input type="checkbox"/>
j. 81 to 90 percent	<input type="checkbox"/>	<input type="checkbox"/>
k. 91 to 100 percent	<input type="checkbox"/>	<input type="checkbox"/>

Question 10: Comments on networking

10. Please add any comments that you wish to make on your institution's networking below.

Question 11: Architectures for centrally administered high-performance computing (HPC) of 1 teraflop or faster

11. At the end of your FY 2011, did your institution provide centrally administered high-performance computing (HPC) of 1 teraflop or faster at peak performance for each type of architecture listed below? If you had a high-performance computing system (1 teraflop or faster) with an accelerator component (e.g., GPU, Intel MIC), please report that system under the one most appropriate architecture below.

Centrally administered HPC is located within a distinct organizational unit with a staff and a budget and is generally available to the campus community. The unit has a stated mission that includes supporting HPC needs of faculty and researchers.

If some of your high-performance computing systems are slower than 1 teraflop and some are faster, please report only the systems that are 1 teraflop or faster.

Had at end of FY 2011

(Mark one "X" for each row.)

Centrally administered HPC architectures

- | | Yes | No |
|--|--------------------------|--------------------------|
| a. Cluster | <input type="checkbox"/> | <input type="checkbox"/> |
| This architecture uses multiple commodity systems each running its own operating system with an Ethernet based (e.g., 10Mb/100Mb/GigE) or high-performance interconnect network (e.g., InfiniBand or Myrinet) to perform as a single system. | | |
| b. Massively parallel processors (MPP) | <input type="checkbox"/> | <input type="checkbox"/> |
| This architecture uses multiple processors within a single system with a specialized high-performance interconnect network. Each processor uses its own memory and operating system (e.g., IBM Blue Gene, Cray XT5 and XE6). | | |
| c. Symmetric multiprocessors (SMP) | <input type="checkbox"/> | <input type="checkbox"/> |
| This architecture uses multiple processors sharing the same memory and operating system to simultaneously work on individual pieces of a program (e.g., SGI Altix UV, HP Superdome, IBM Power 775). | | |
| d. Parallel vector processors (PVP) | <input type="checkbox"/> | <input type="checkbox"/> |
| This architecture uses multiple vector processors sharing the same memory and operating system to simultaneously work on individual pieces of a program. | | |
| e. Experimental/Emerging architecture (<i>Please describe.</i>) | <input type="checkbox"/> | <input type="checkbox"/> |
| This architecture uses technologies not currently in common use for HPC systems. | | |
| <hr/> | | |
| f. Special purpose architecture (<i>Please describe.</i>) | <input type="checkbox"/> | <input type="checkbox"/> |
| This custom-designed architecture uses established technology that supports a special purpose system that is dedicated to a single type of problem. | | |
| <hr/> | | |
| g. Other architecture (<i>Please describe.</i>) | <input type="checkbox"/> | <input type="checkbox"/> |
| <hr/> | | |

Question 12: Centrally administered HPC with accelerators

12. How many of the centrally administered high-performance computing systems you reported in Question 11 (a-g) have accelerators (e.g., GPU, Intel MIC)?

If your institution did not report any centrally administered HPC, check this box and go to Question 22

Number of systems with accelerators (*If none, enter "0."*) systems

Question 13: Centrally administered clusters of 1 teraflop or faster

13. At the end of your FY 2011, what was the peak theoretical performance of (a) your **fastest** computing cluster of 1 teraflop or faster, and (b) **all** your computing clusters of 1 teraflop or faster (including the fastest one)? Include only clusters that are centrally administered.

A computing cluster uses multiple commodity systems each running its own operating system with an Ethernet based (e.g., 10Mb/100Mb/GigE) or high-performance interconnect network (e.g., InfiniBand or Myrinet) to perform as a single system.

If some of your cluster systems for high-performance computing are slower than 1 teraflop and some are faster, please report only the systems that are 1 teraflop or faster.

If you have only one cluster that is 1 teraflop or faster, report the same number for rows a and b.

If your institution did not administer any such clusters, check this box and go to Question 14

Number of teraflops

- a. Fastest cluster of 1 teraflop or faster
- b. All computing clusters of 1 teraflop or more (including the fastest cluster).....

Question 14: Centrally administered MPP of 1 teraflop or faster

14. At the end of your FY 2011, what was the peak theoretical performance of (a) your **fastest** MPP system of 1 teraflop or faster, and (b) **all** your MPP systems of 1 teraflop or faster (including the fastest one)? Include only MPP systems that are centrally administered.

Massively parallel processing (MPP) systems use multiple processors within a single system with a specialized high-performance interconnect network. Each processor uses its own memory and operating system (e.g., IBM Blue Gene, Cray XT5 and XE6).

If some of your MPP systems for high-performance computing are slower than 1 teraflop and some are faster, please report only the systems that are 1 teraflop or faster.

If you have only one system that is 1 teraflop or faster, report the same number for rows a and b.

If your institution did not administer any such
MPP systems, check this box and go to Question 15.....

Number of
teraflops

- a. Fastest MPP system of 1 teraflop or faster
b. All MPP systems of 1 teraflop or more
(including the fastest system)

Question 15: Centrally administered SMP of 1 teraflop or faster

15. At the end of your FY 2011, what was the peak theoretical performance of (a) your **fastest** SMP system of 1 teraflop or faster, and (b) **all** your SMP systems of 1 teraflop or faster (including the fastest one)? Include only SMP systems that are centrally administered.

Symmetric multiprocessing (SMP) systems use multiple processors sharing the same memory and operating system to simultaneously work on individual pieces of a program (e.g., SGI Altix UV, HP Superdome, IBM Power 775).

If some of your SMP systems for high-performance computing are slower than 1 teraflop and some are faster, please report only the systems that are 1 teraflop or faster.

If you have only one system that is 1 teraflop or faster, report the same number for rows a and b.

If your institution did not administer any such
SMP systems, check this box and go to Question 16.....

Number of
teraflops

- a. Fastest SMP system of 1 teraflop or faster
b. All SMP systems of 1 teraflop or more
(including the fastest system)

Question 16: Centrally administered experimental/emerging computing systems of 1 teraflop or faster

16. At the end of your FY 2011, how many experimental/emerging computing systems of 1 teraflop or faster did your institution administer? Include only systems that are centrally administered.

Experimental/Emerging computing systems use technologies not currently in common use for HPC systems.

If your institution did not administer any such systems,
check this box and go to Question 17

Number of **systems** of 1 teraflop or faster systems

Question 17: Centrally administered special purpose computing systems of 1 teraflop or faster

17. At the end of your FY 2011, how many special purpose computing systems of 1 teraflop or faster did your institution administer? Include only systems that are centrally administered.

Special purpose computing systems use a custom-designed architecture using established technology that supports a special purpose system that is dedicated to a single type of problem.

If your institution did not administer any such systems,
check this box and go to Question 18

Number of **systems** of 1 teraflop or faster systems

Question 18: External users of centrally administered HPC of 1 teraflop or faster

18. During your FY 2011, which types of external users listed below used any of your institution's centrally administered HPC of 1 teraflop or faster?

Used your HPC during FY 2011

(Mark one "X" for each row.)

Type of external user	Yes	No	Uncertain
a. Colleges and universities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Include public and private academic institutions and systems.			
b. Governments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Include local, state, and regional jurisdictions.			
c. Non-profit organizations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Include legal entities chartered to serve the public interest and that are exempt from most federal taxation.			
d. Industry	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Include for-profit companies, either publicly or privately held.			
e. Other (Please describe.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Question 19: Usable online storage for centrally administered HPC of 1 teraflop or faster

19. At the end of your FY 2011, what was the total **usable** online storage available for centrally administered HPC of 1 teraflop or faster?

Usable storage is the amount of space for data storage that is available for use after the space overhead required by file systems and applicable RAID (redundant array of independent disks) configurations is removed.

Online storage includes all storage providing immediate access for files and data from your HPC systems (of at least 1 teraflop). Storage can be either locally available to specific HPC systems or made available via the network. For example, storage may be available via SAN (storage area network) or NAS (network attached storage) environments.

(Mark one "X")

- a. None
- b. Less than 1 terabyte
- c. 1 to 5 terabytes
- d. 6 to 10 terabytes
- e. 11 to 25 terabytes
- f. 26 to 50 terabytes
- g. 51 to 100 terabytes
- h. 101 to 250 terabytes
- i. 251 to 500 terabytes
- j. 501 to 1,000 terabytes
- k. 1,001 or more terabytes (*Please specify.*)

Question 20: Usable shared storage for centrally administered HPC of 1 teraflop or faster

20. At the end of your FY 2011, how much of the usable online storage reported in Question 19 was shared storage?

Usable storage is the amount of space for data storage that is available for use after the space overhead required by file systems and applicable RAID (redundant array of independent disks) configurations is removed.

Online storage includes all storage providing immediate access for files and data from your HPC systems (of at least 1 teraflop). Storage can be either locally available to specific HPC systems or made available via the network. For example, storage may be available via SAN (storage area network) or NAS (network attached storage) environments.

Shared storage includes the portion of online storage that is available simultaneously to multiple HPC systems (of at least 1 teraflop) via a network making use of SAN, NAS, file system mounting, or similar technologies.

(Mark one “X”)

- a. None
- b. Less than 1 terabyte
- c. 1 to 5 terabytes
- d. 6 to 10 terabytes
- e. 11 to 25 terabytes
- f. 26 to 50 terabytes
- g. 51 to 100 terabytes
- h. 101 to 250 terabytes
- i. 251 to 500 terabytes
- j. 501 to 1,000 terabytes
- k. 1,001 or more terabytes (*Please specify.*)

Question 21: Archival storage for centrally administered HPC of 1 teraflop or faster

21. At the end of your FY 2011, what was the total archival storage available specifically for centrally administered HPC of 1 teraflop or faster? **Do not** include backup storage.

Archival storage can be either on-line or off-line. It is typically long-term storage for files and data and does not support immediate access from your HPC resources.

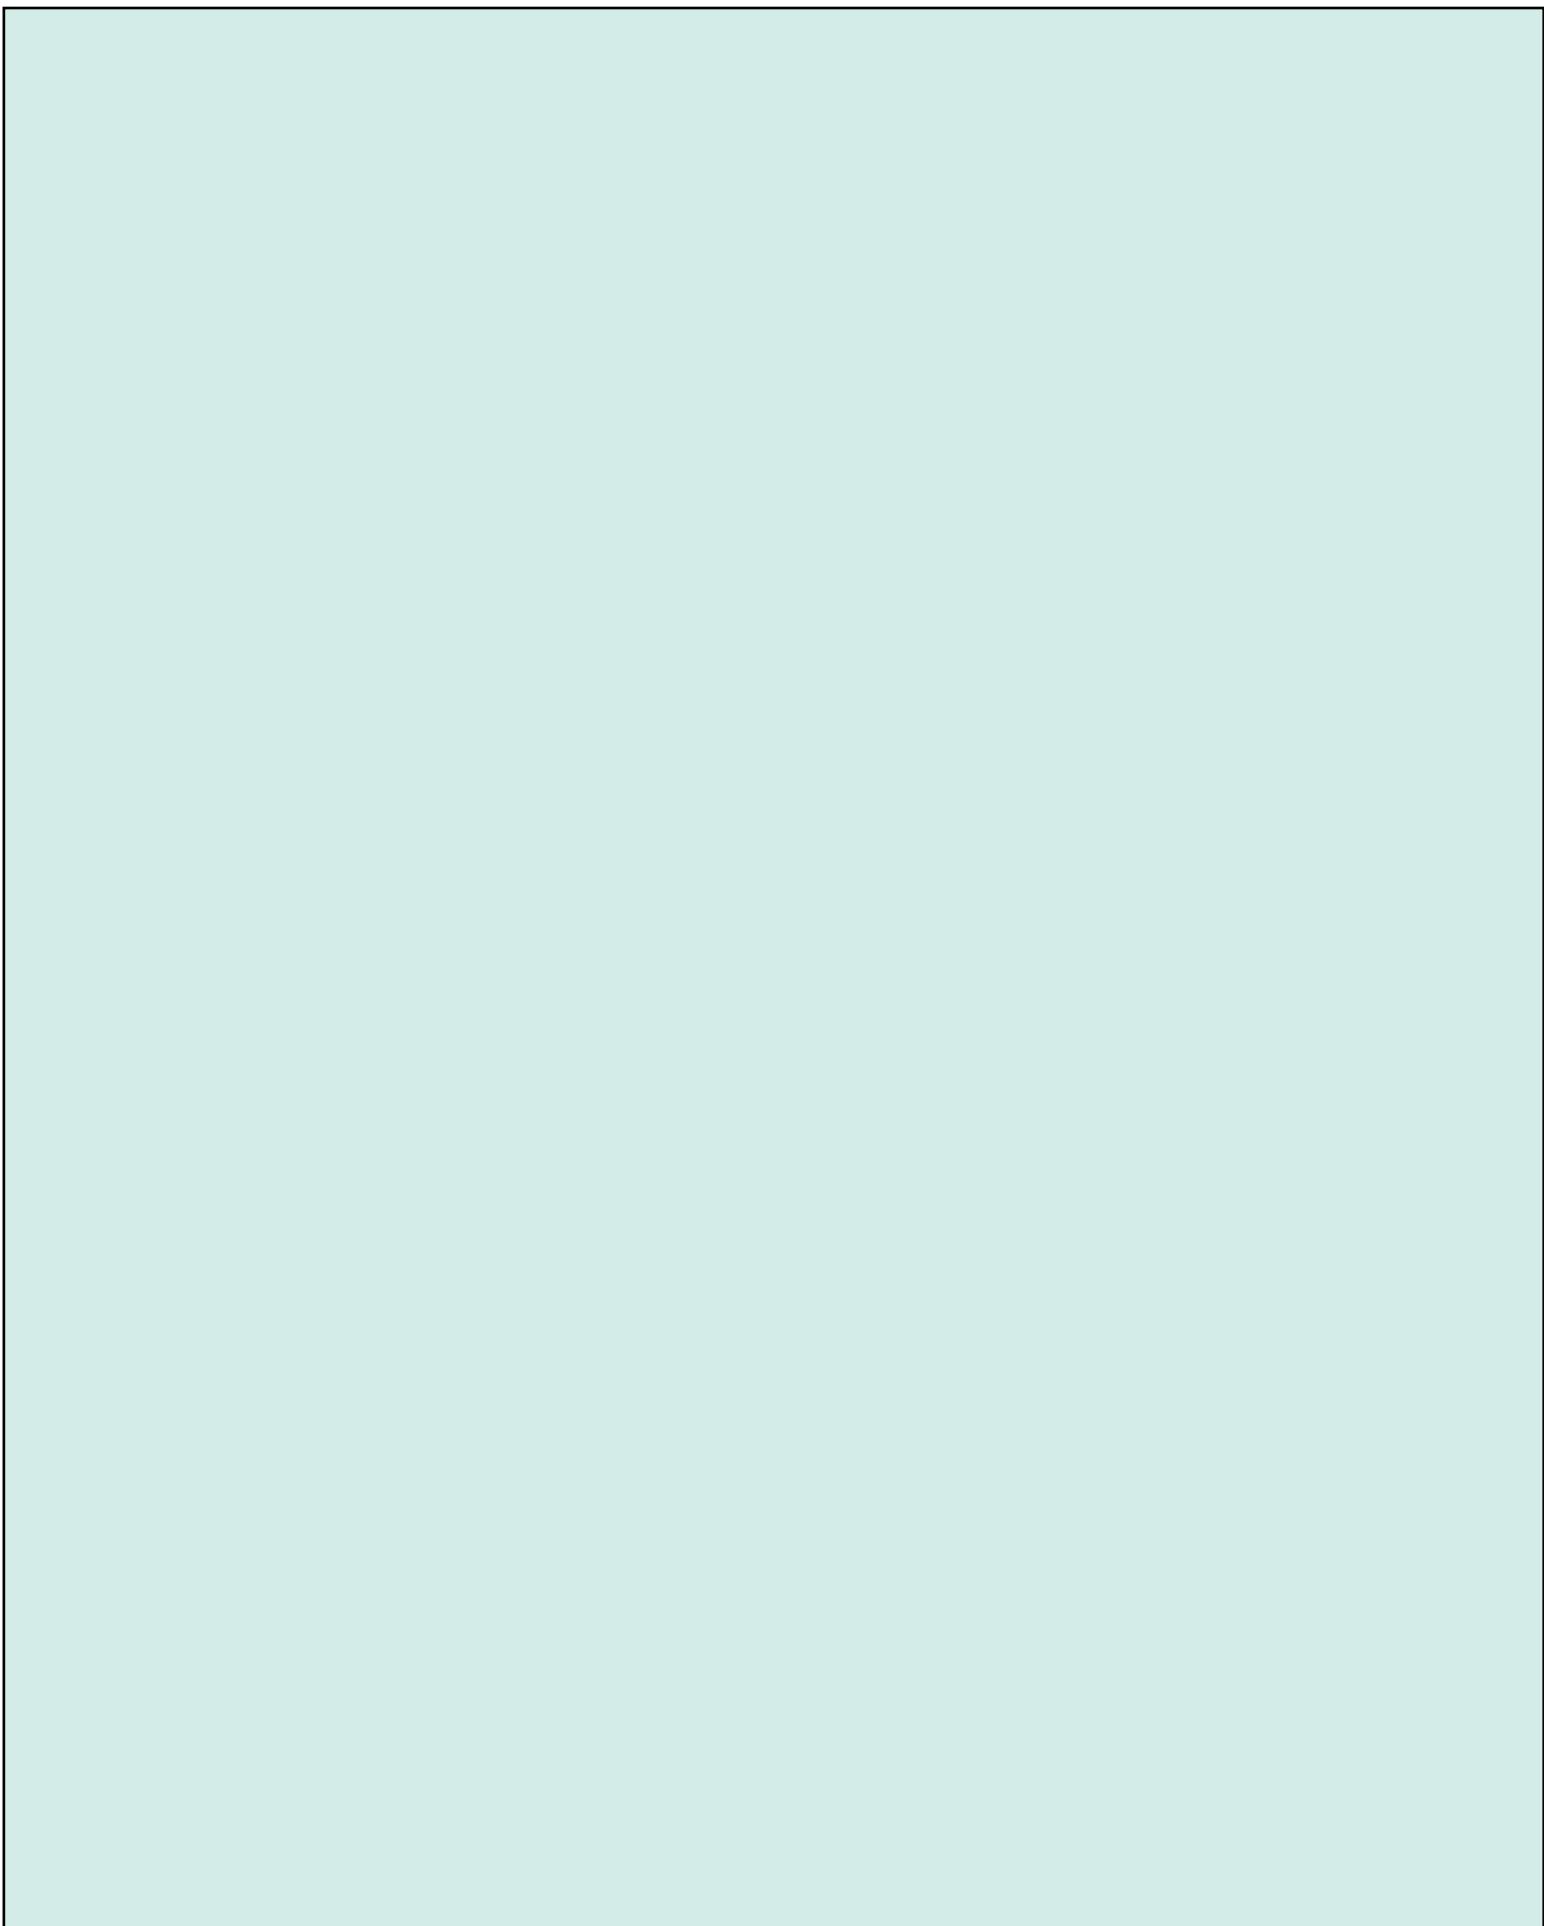

(Mark one “X”)

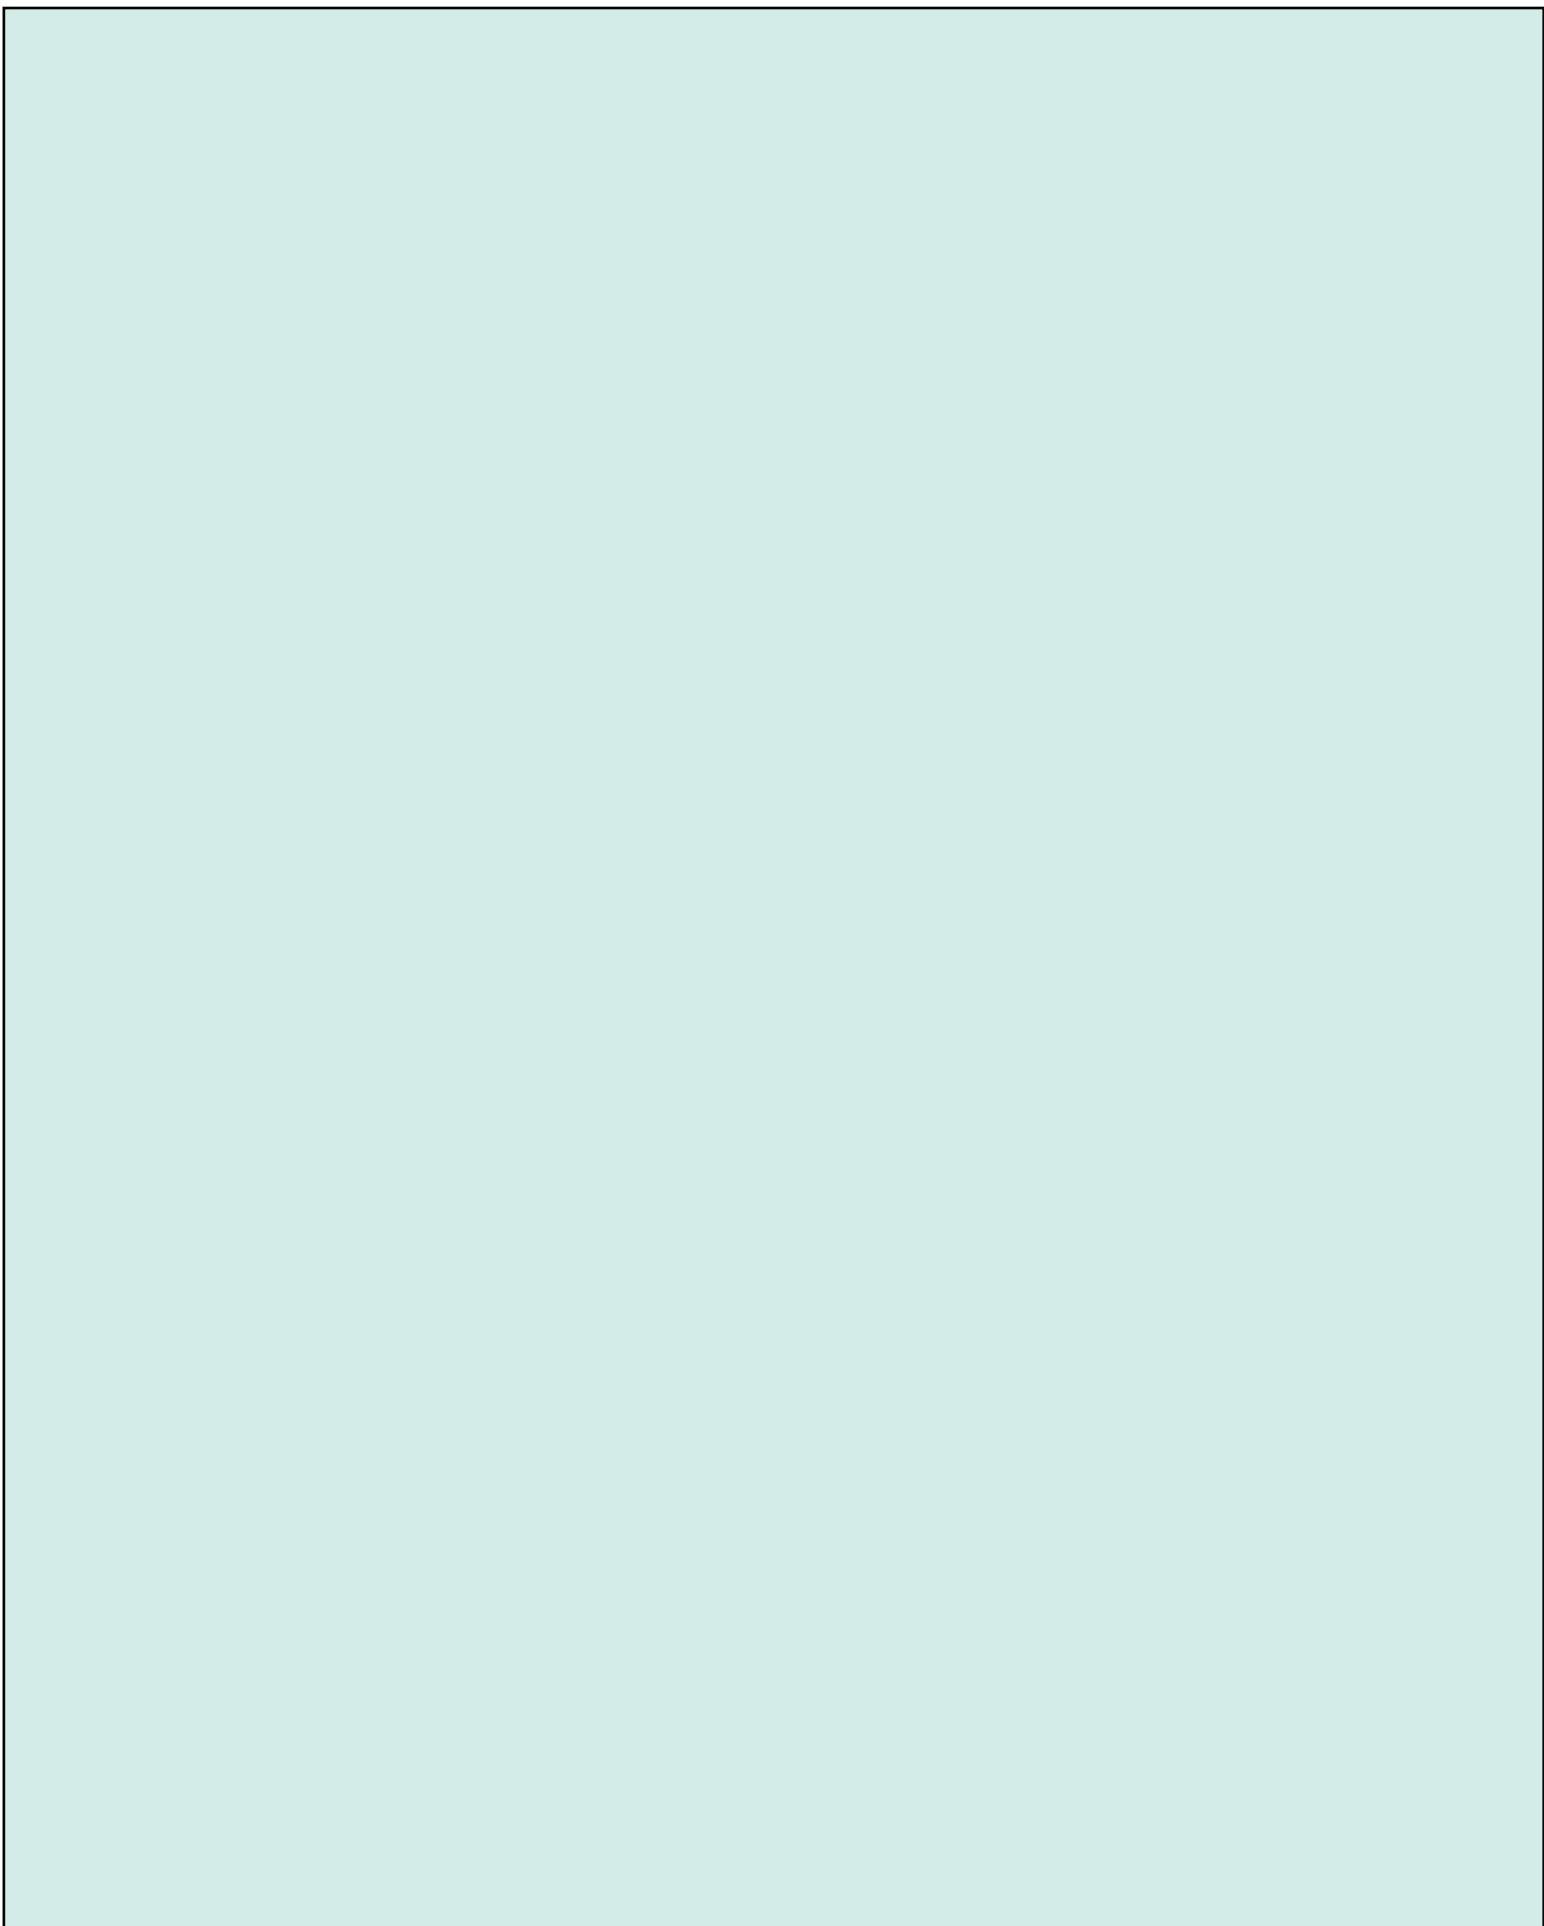

- a. None
- b. Less than 100 terabytes.....
- c. 101 to 250 terabytes.....
- d. 251 to 500 terabytes.....
- e. 501 to 750 terabytes.....
- f. 751 to 1,000 terabytes.....
- g. 1,001 to 5,000 terabytes.....
- h. 5,001 to 10,000 terabytes.....
- i. 10,001 or more terabytes (*Please specify.*)

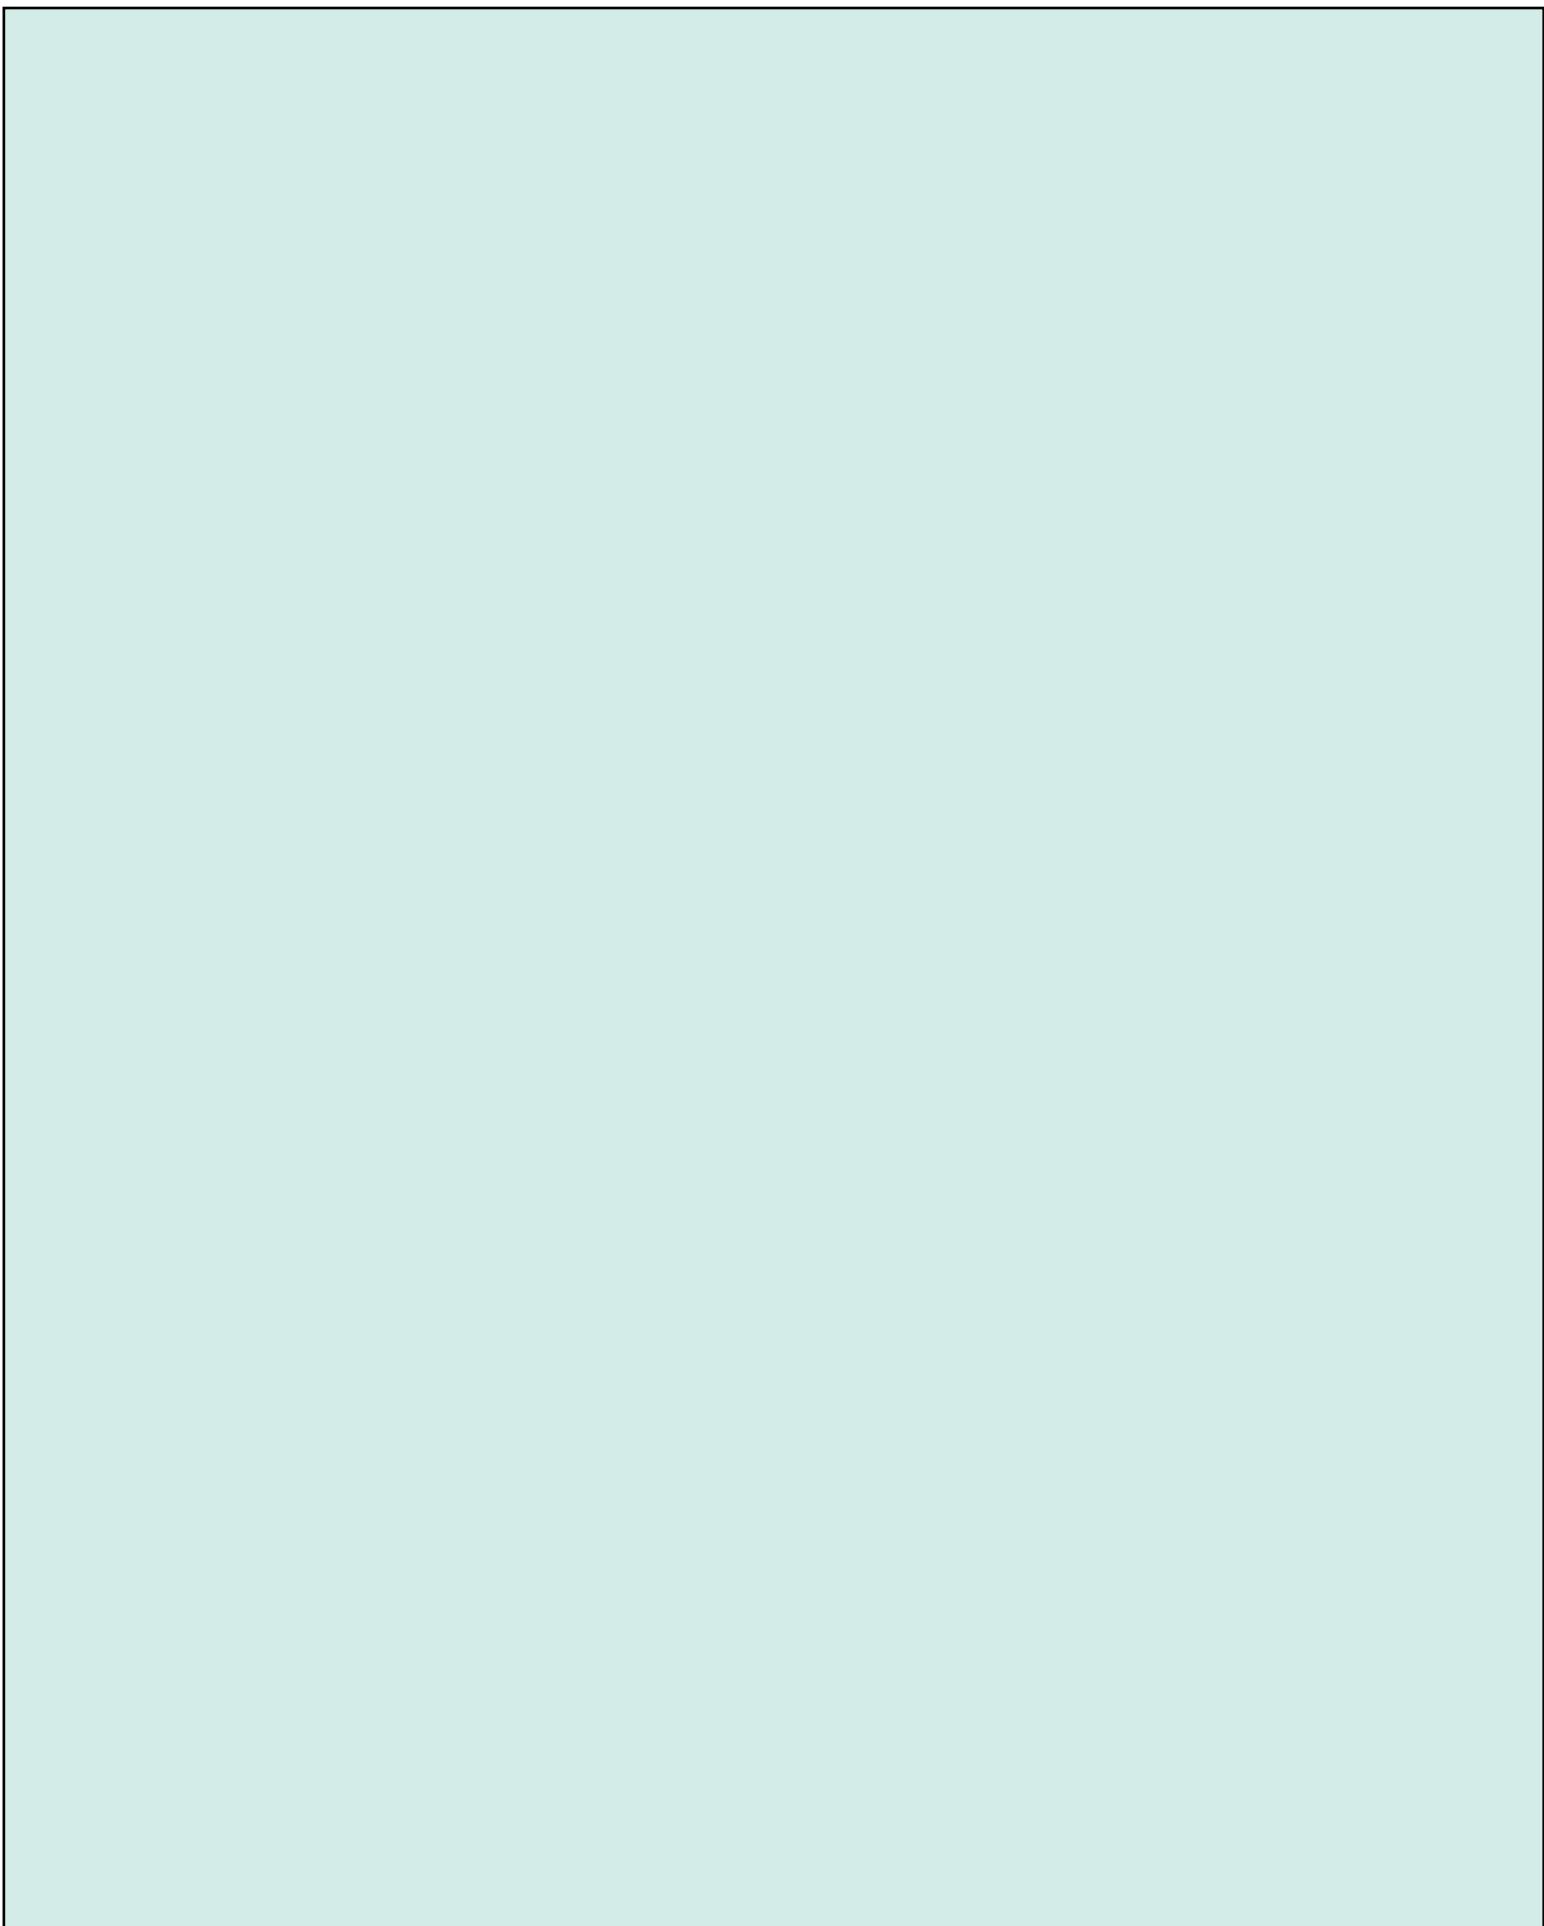

Question 22: Comments on HPC

22. Please add any comments you may wish on your institution's HPC below.

Thank you. This is the end of Part 2. Please send this part of the survey to your institutional coordinator according to the arrangements you made with your institutional coordinator (named on the label on the front cover of the survey questionnaire).

Westat, Inc., under NSF contract number DACS1144297, collected, processed, and tabulated the data in this report and also composed the general and technical notes. Westat senior staff who worked on this project were Lucinda (Cindy) Gray, Eric Jodts, and Timothy Smith. RTI International edited the final report and composed the tables for publication under NSF contract number NSFSRS0742359. RTI staff members August Gering, Valerie Garner, Roxanne Snaauw, and Marceline Murawski performed this work.
